TUE - APR 5 - Handicap-accessible Fishing in Green Meadows Workshop

Join Michelle Stevens from 1:00 to 3:00 PM, as we accompany the Handicap-accessible Fishing in Green Meadows Workshop. Fishing is a great way to enjoy the outdoors and relax while spending time with family and friends. Fishing is also a great way to get exercise and improve your health. Fishing can be a challenging activity for people with disabilities, but there are many adaptive fishing equipment and techniques that can make it easier and more enjoyable. Michelle will be sharing information about adaptive fishing equipment, techniques, and resources. This workshop is open to all students with disabilities and their families. Bring your own fishing equipment if you have it, or we will provide some for you to use. Refreshments will be provided. Don't miss this opportunity to learn about adaptive fishing and have a fun day outdoors! Registration is required.
