5.1.2 GT TCSG State Standard Curriculum Materials

Program Standards

Approved program standards are available on the Knowledge Management System website. TCSG mandates the program standards for each program offered in the state. Program standards include general program information and specific program curriculum standards. Course prerequisites and course sequences are suggestions rather than requirements. Revisions to program standards are initiated through program area consortia throughout the state and submitted to TCSG for approval.

Any questions regarding the use or application of program standards should be directed to division deans or to the vice president of academic affairs.
