8.6 GT Quick Start

The Continuing Education Department fully supports the training efforts of the Georgia Quick Start Program, delivered through the Technical College System of Georgia. Generally, the college serves as a third partner to the training relationship engaged between the Quick Start Program and a business entity, assisting in coordinating use of training space and providing services as needed. Once the Quick Start Program has completed its training, the department stands poised to deliver customized contract training and services to address the business's ongoing workforce needs.
