

WELDING

A photograph showing four welders in a workshop. They are wearing protective gear, including helmets and jackets, and are working on metal structures. One welder is on the left, working on a red barrel. Two others are in the center, working on a blue barrel. The fourth is on the right, working on a green barrel. They are using various welding tools and cables. The background shows a brick wall and yellow safety barriers.

INFORMATION SESSIONS

Gwinnett Tech's Welding Program hosts information sessions which provide an overview of program length, courses and requirements. Learn about the Welding and Joining Diploma, and Certificate options that include Gas Tungsten Arc Welding, Gas Metal Arc Welding, Flux Cored Arc Welding and Advanced Shielded Metal Arc Welding. Information sessions are open to all individuals interested in learning more about our welding program.
